REMOTE WITH YOUR FIRE STICK, AND
ADD UP TO 7 REMOTES TO YOUR SYSTEM

How to pair an Amazon Fire Stick remote with your Fire Stick

Hello I like to introduce myself my name is Roosevelt Simmons and I'm an agent of a streaming company called All Access TV my agent number is 824049 and because of this I like to research the Internet and locate articles that specifically helps individuals that are using a fire stick. I hope you find this article found at [businessinsider.com](https://www.businessinsider.com) helpful and will use the techniques or tools explained.

You can pair up to seven Amazon Fire Stick remotes to one device.

How to pair an Amazon Fire Stick remote with your Fire Stick, and add up to 7 remotes to your system

- You can pair an Amazon Fire Stick remote through the device's "Controllers and Bluetooth Devices" menu.
- You'll find this option to pair your Amazon Fire Stick's remote in your settings.
- Once on this menu, you'll need to hold down the Home button.
- [Visit Business Insider's homepage for more stories.](#)

The [Amazon Fire Stick's](#) remote allows you to access all of the features of your Amazon Fire Stick.

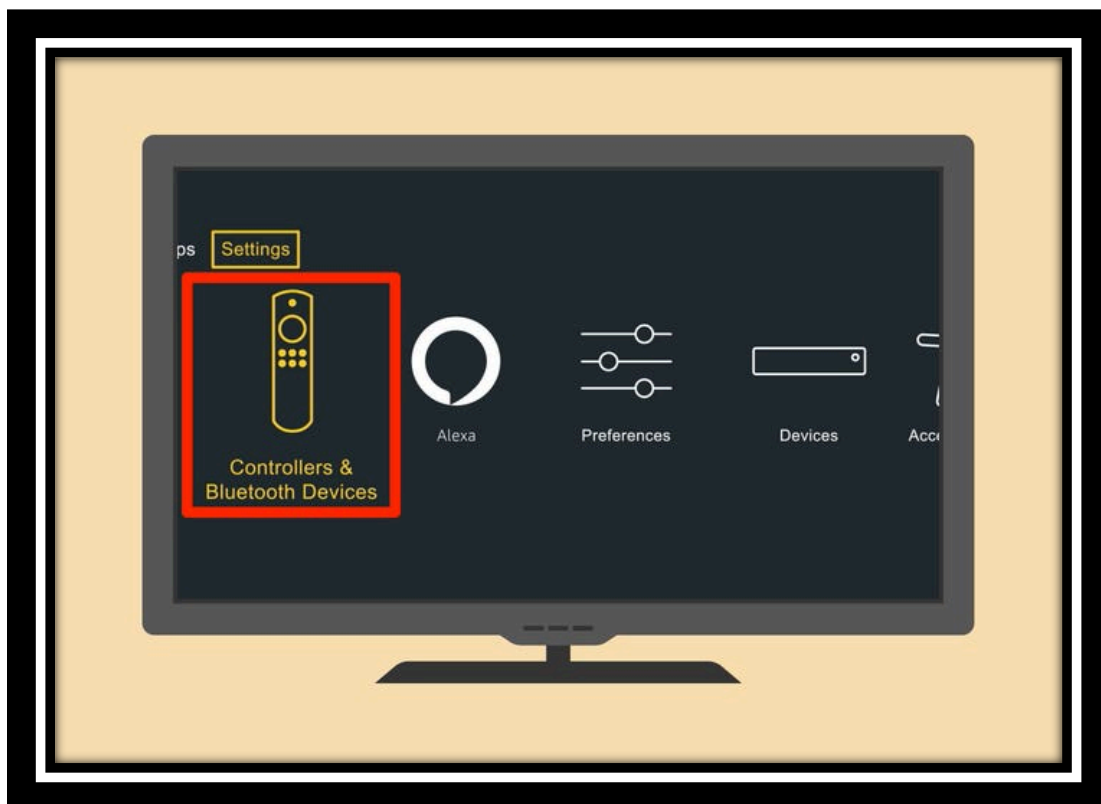

How to pair an Amazon Fire Stick remote with your Fire Stick

Depending on which version of the [Fire Stick](#) you have, you can use the remote to search for what you want to watch, increase or decrease the volume, see sports scores, check the weather, and more — all with voice control.

The [Amazon Fire Stick](#) allows you to pair up to seven remotes. Here's how to do it.

How to pair an [Amazon Fire Stick](#) remote

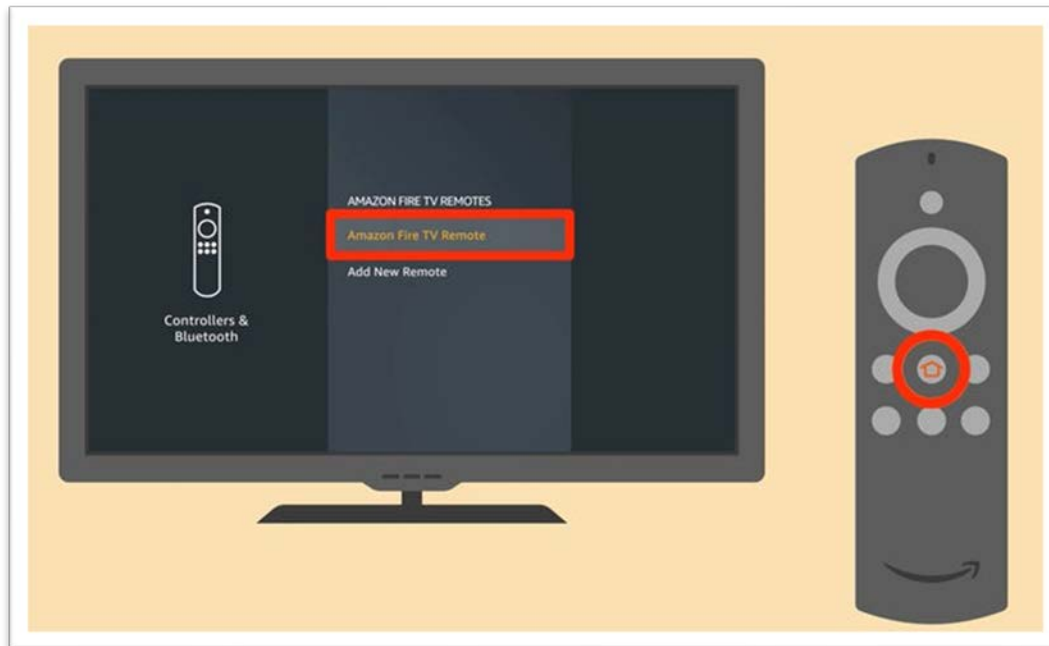

1. Turn on the television that your Amazon Fire Stick is set up on, and switch to the right HDMI channel.
2. Select "Settings" from the Fire TV's menu. If you're trying to set up a remote without already having another remote paired, use the Fire TV app for iPhone or Android, which can be used as a temporary remote.
3. Select "Controllers and Bluetooth Devices," and then select the "Amazon Fire TV Remote" option on the screen.

Open the "Controllers" menu. Amazon
